Introduction

I, Jake Blight, as the acting accountable authority of the Office of the Inspector-General of Intelligence and Security (OIGIS), present the 2015-16 OIGIS corporate plan, which covers the periods of 2015-16 to 2018-19, as required under paragraph 35(1)(b) of the *Public Governance, Performance and Accountability Act 2013*.

Purposes

The purpose of the OIGIS is to assist Ministers in the oversight and review of the Australian intelligence agencies, to provide assurance to Parliament and the public about the scrutiny of the operation of those agencies, and to assist in investigating intelligence and security matters.

In performing this role, the Inspector-General of Intelligence and Security (IGIS), who is an independent statutory officer established by the *Inspector-General of Intelligence and Security Act 1986* (IGIS Act), reviews the activities of the intelligence agencies:

- Australian Security Intelligence Organisation (ASIO)
- Australian Secret Intelligence Service (ASIS)
- Australian Signals Directorate (ASD)
- Australian Geospatial-Intelligence Organisation (AGO)
- Defence Intelligence Organisation (DIO)
- Office of National Assessments (ONA).

The objects provision of the IGIS Act (section 4) sets out the purpose of the office:

- to assist ministers in the oversight and review of:
 - the compliance with the law by, and the propriety of particular activities of, Australian intelligence agencies; and
 - the effectiveness and appropriateness of the procedures of those agencies relating to the legality or propriety of their activities; and
 - certain other aspects of the activities and procedures of certain of those agencies; and
- to assist ministers in ensuring that the activities of those agencies are consistent with human rights; and
- to assist ministers in investigating intelligence or security matters relating to Commonwealth agencies, including agencies other than intelligence agencies; and
- to allow for review of certain directions given to ASIO by the Attorney-General; and
- to assist the Government in assuring the Parliament and the public that intelligence and security matters relating to Commonwealth agencies are open to scrutiny, in particular the activities and procedures of intelligence agencies.

In addition, the *Public Interest Disclosure Act 2013* (PID Act) requires the Inspector-General to:

- receive and, where appropriate, investigate disclosures about suspected wrongdoing within the intelligence agencies
- assist current or former public officials employed, or previously employed, by intelligence agencies, in relation to the operation of the PID Act
- assist the intelligence agencies in meeting their responsibilities under the PID Act, including through education and awareness activities, and
- oversee the operation of the PID scheme in the intelligence agencies.

The Inspector-General also has a role under *the Archives Act 1983* and the *Freedom of Information Act 1982* to provide expert evidence to the Administrative Appeals Tribunal and the Information

Commissioner in relation to national security, defence, international relations and confidential foreign government communications exemptions.

Environment

The OIGIS operates in a unique environment where its role is to provide rigorous oversight and public assurance about specific agencies, but without being able to reveal publicly much of its activity.

In an environment where intelligence agency functions and powers have been and are being expanded, even greater weight is attached to the importance of the OIGIS's role in providing oversight and checks and balances to new powers.

The Government provided increased funding to OIGIS (in 2014-15) and exempted OIGIS from the efficiency dividend from 2015-16. This will assist in enabling focused attention on agencies' new powers, but the OIGIS will need to continue to examine and review its inspection and work programmes to ensure the office's activities are conducted efficiently and effectively with a focus on the high risk activities of the intelligence agencies. With the additional funding OIGIS expects an FTE of up to 16 in 2015-16.

A range of factors may affect and influence the OIGIS's performance, including further changes in legislation covering agency powers and the IGIS's role, changes in agencies' activities, recruitment challenges (including time lags due to the need for high level security clearances), and changes in the numbers and complexity of complaints and inquiries.

The OIGIS recognises the importance of its oversight being as visible and transparent as possible, noting that sharing lessons learnt can lead to improvements in public administration, and recognising the strong public interest in intelligence and security matters and the need to establish and maintain the credibility of oversight. Accordingly the office will continue to make public as much of its work as is possible within appropriate security constraints.

Performance

The key **activities** by which the OIGIS seeks to achieve its purpose are:

- conducting inquiries as appropriate (which may be 'own motion', in response to complaints or referrals, or at the request of intelligence agency ministers or the Prime Minister)
- undertaking comprehensive inspection and visit programmes to monitor and review intelligence agencies' operational activity
- providing effective and timely responses to complaints or referrals received from members of the public, ministers or members of parliament
- facilitating the investigation of public interest disclosures and undertaking other responsibilities under the PID Act
- providing advice to parliamentary committees and others on oversight issues relating to intelligence agency powers and functions

- providing evidence to the Administrative Appeals Tribunal and the Information Commissioner as required
- undertaking presentations to new and existing employees of intelligence agencies to ensure an awareness and understanding of their responsibilities and accountability
- liaising with other accountability or integrity agencies in Australia and overseas.

Key performance indicators

The effectiveness of the OIGIS is measured and assessed against four key performance indicators. These indicators take into account the unique role and functions of the office as a specialised review body:

- the breadth and depth of inspection work undertaken
- the timeliness of completion of inquiries or complaint resolution
- the level of acceptance by intelligence agencies, complainants and ministers of findings and recommendations of inquiries conducted
- the extent to which there has been change within the intelligence agencies as a result of activities of OIGIS.

How we measure and report against these indicators

We use a range of quantitative and qualitative information to measure performance. The metrics include:

- number of inquiries conducted
- number of complaints received and handled
- number of public interest disclosure matters handled
- number of inquiry recommendations accepted and implemented
- number of outreach activities
- target percentage (90%) of complaints acknowledged within five business days, and 85% of visa-related complaints resolved within two weeks.

While this information is useful in identifying trends in activity numbers over the reporting periods, it does not give a complete picture of the OIGIS's performance in fulfilling its purposes. For example, OIGIS inquiries and inspection programmes are measured on a qualitative rather than quantitative basis. Rigorous and effective oversight of intelligence agencies' activities, and the ability to provide assurances about those activities, depends on much more than simple numbers of activities. Some issues (for example, those which raise serious questions about legality or propriety, entail the consideration of complex legal issues, and touch on different agencies) will necessarily and appropriately require focused resourcing and a longer time period for completion. Others (such as complaints about a single confined issue relating to one agency) may be able to be investigated and responded to very quickly and well within target timeframes.

Accordingly, our metrics reporting will be supplemented by qualitative information directed at assessing the breadth and depth of our inspection and inquiry work, the level of acceptance of that work, and the extent to which our work results in changes to intelligence agencies' activities. This information will be drawn from a range of sources (including our records of the nature of particular

inquiries and complaints, the reactions of intelligence agencies, complainants and ministers to our responses, inquiries and inspections, and our observations through follow-up inspections of any changes in agency practices as a result of past recommendations).

We continue to review our measures to ensure we have the most effective measures of performance in light of the particular nature of our role, and changes in our environment.

We will report on our performance using our performance measures, supplemented with qualitative performance information, annually through our Annual Performance Statement and Annual Report. This will feed into ongoing review of our performance measures.

Capability

The OIGIS's capability framework and workforce planning will provide support in a dynamic, changing, security-sensitive and tight fiscal environment.

The Office will continue to promote a culture of professionalism and integrity, and ensure the small office is staffed with people with the right skills across a range of disciplines (including legal, investigative, financial, and technical capacities). While the Office has an active programme to recruit in line with our specific needs, the Office faces the same challenge as other agencies working in the security and intelligence area, namely the ability to recruit people with the appropriate security clearance in tight timeframes (security clearances can take up to 12 months to process).

The Office will continue to assess and review priorities and allocate resources accordingly.

It will also be important for the Office to continue to have access to secure and effective IT systems.

Risk oversight and management

The OIGIS's risk management and corporate and operational planning processes reflect the small size and specialist function of the office.

The OIGIS has established and maintains appropriate systems of risk oversight, management and internal controls in accordance with section 16 of the PGPA Act and the *Commonwealth Risk Management Policy*.

The Risk Management Plan includes controls designed to mitigate risks including personnel related risks, accidental or intentional loss of information, segregation of duties, failure or compromise of information technology systems, physical security of the office and facilities, fraud prevention, detection and management, and corporate compliance requirements.

Regular monitoring of risks is undertaken, considered and discussed by the management team, and reported to the Audit Committee.

The Audit Committee is established and structured in accordance with section 45 of the PGPA Act and the PGPA Rules. The Audit Committee meets on a periodic basis to consider matters including risk management, internal control, financial reporting, compliance requirements, performance reporting, and governance arrangements.

The office addresses corporate and operational planning matters through:

- an annual forward planning process to set strategic priorities
- regular meetings between the IGIS and senior staff members, to review and document operational priorities
- regular meetings between the IGIS and all office staff, during which internal guidelines, procedures and governance issues are discussed
- regular internal training and other information-sharing sessions
- a forward plan for inspection activities in each intelligence agency, which is determined in consultation with the relevant agency head (in accordance with section 9A of the IGIS Act).
